

RADIANT SECURITY SERVICES

Protecting you and your customers

Radiant Security Services is a new offering of products and services that goes beyond mere compliance with current data security standards by providing critical proactive management tools and a threat response network for your restaurants.

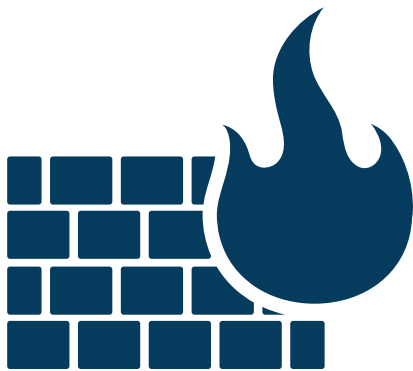

It's not simply about your restaurant's security, it's about maintaining the relationships that you have developed with your customers. It's about protecting consumer trust.

What is

Is someone managing your firewall and network today?

Q: Why are we well equipped to perform these services for you?

A: You've made the decision to trust Radiant with your restaurant technology. Let us alleviate the burden of the uncertainty that your restaurants aren't secure. We focus on the problem and provide the security solution to protect the privacy of your customers and the financial health of your business from Internet cyber criminals.
